

1. Please uninstall the current App(KEEKOON or P2PLiveCam).
2. Download the latest App(KEEKOON only) from <http://www.keekoonvision.com/download-details-a>
KEEKOON and P2PLiveCam are the same App.

Important notice for Android users:

Please do not download the Android App from Google Play Store, the App in Google play store will not being updated.

The latest App version is:

Android: V1.7.5

iOS: V1.8

3. Please re-all the camera to your App when you are in the same network with the camera. Press Add button and search the camera in LAN.
4. The App will notify that the camera's new information will be updated to the camera. Then the camera will reboot and try to connect to Internet.
5. If your App will not show any information, please check them below:
 - 1) Close the App and re-launch the App
 - 2) Reset the camera to factory default by press the button under the camera for 10 seconds. Then re-config the camera as a new camera by network cable.
 - 3) If your current camera version is V1.8.13 A HD, please update to V1.9.4 from the help of this page:
<http://www.keekoonvision.com/firmware-download-a>

For the help of adding new cameras in KEEKOON app, please find the help of this quick start guide.
